MARKET NOTICE NO – 249

Trader abbreviation of counterparties for stock exchange trades Delivery of ESY Release 5.5

To accommodate the wishes of market participants for enhanced anonymity under the current trading arrangements, it has been decided that with the introduction of the Exchange System Release 5 (EM5) the trader abbreviation will no longer appear on the Trading System. Up to now, on conclusion of a trade both the Member ID of the counterparty and the name (Trader_Id) of the settling trader were disclosed to the parties to the trade.

The implementation of this change will be performed on the virt-x test environment (RO1) over the maintenance weekend of 1 & 2 September and on the production environment (V01) over the maintenance weekend of 15 & 16 September 2001.
